

Education

Bachelor of Technology Artificial Intelligence and Data Science

Kongu Engineering College,
Perundurai, Erode

- Current CGPA :7.02*
- Sept 2023 - July 2027 (Batch)

High School Education

Grade 12-81.3%,
Bharathiyar Matric Higher
Secondary School (2023)
Grade10-All Pass,
Bharathiyar Matric Higher
Secondary School (2021)

Technical Skills

Programming Languages

Java C
Python Git(Basic)

Web Development

React Node.js
JavaScript Express.js
MongoDB SQL

AI and Data Engineering

TensorFlow Sklearn PromptEngineering
Keras LLMs Embeddings

Data Analytics

Power BI

Certifications

- Microsoft Certified: Power BI
DataAnalyst
- MongoDB Certified
Associate Developer

Leadership

- Technical Team-AI Association
KEC(2024-2026)
- Executive Member-CSI(COMPUTER
SOCIETY OF INDIA) (2024-2026)

Achievements

- Winner -2nd WebDevelopment(CSI)
- Finalist- Project Presentation(Ruby
Year TechnoFest

Area Of Interest

- Gen AI
- Machine Learning
- Agentic AI (n8n)

Experience

Full Stack Developer Intern

Jan 2026 – ongoing

Cube AI Solutions

- Developed a React.js Resume Builder with 90+ ATS templates, real-time preview, and export support, ensuring smooth performance and cross-browser compatibility.
- Built a Salesforce chatbot with lead and opportunity management, and integrated a voice agent for enhanced user interaction

Gen AI Consortium

Nov 2024 - Jan 2025

Analyzed datasets using Python libraries (Pandas, NumPy) to explore patterns and prepare data for machine learning model implementation.

Projects

Embedding-Based Job Recommendation System

Developed an AI-based resume screening and job-freelancer matching system using Mini LLM embeddings for semantic matching beyond keywords. Implemented cosine similarity for ranking and recommendations, with features for project posting, hiring, and automatic profile updates.

[GitHub](#)

CEMS-College Event Management System

Full-stack web application built with React/TypeScript and Node.js/Express, integrating a Google Gemini AI chatbot for event discovery and management. Implemented role-based access, real-time event browsing, registration with capacity control, and JWT-based authentication using MongoDB.

[GitHub](#)

Pneumonia Detection using Deep Learning

Developed a CNN-based pneumonia detection system using TensorFlow and VGG16 transfer learning, data preprocessing, augmentation, and validation; built an end-to-end pipeline with model training, evaluation, and Streamlit deployment, achieving 94% accuracy in chest X-ray classification.

[GitHub](#)

Codebase RAG System (AI-Powered Repository Assistant)

Built an AI-driven codebase analysis platform using FastAPI and LangChain, enabling natural language querying of repositories with Llama 3.1 (Groq). Implemented FAISS-based semantic search with HuggingFace embeddings, integrated MongoDB Atlas for chat history, and developed a React dashboard for real-time code visualization.
